

# Famous for protection

## Bubble & Foam Laminates

Dependent on the substrate, packaging laminates can be used in a huge variety of industries such as flooring, automotive, furniture and electronics.

When compared to un laminated bubble or foam packaging, laminates can offer increased strength and durability with improved presentation.

### Astro GUARD®

A premium super tough, triple layer, bubble to Astro Foam laminate. Astro Guard features astonishing puncture and tear strength combined with superb cushioning properties.

Triple protection, perfect for automotive and heavy-duty applications.

Currently available in size 1250mm x 100m.

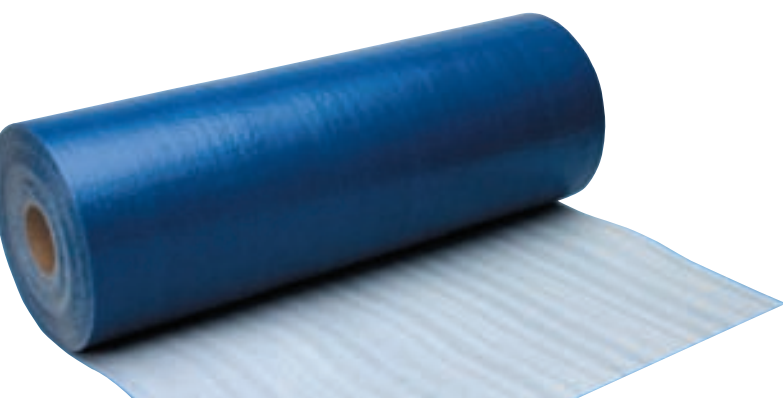

### Astro Adhesive Bubble

Small bubble laminated to an adhesive film.

A fast, efficient way of wrapping and protecting - no tape needed. Available in bespoke widths in either low or high tack. Ideal for protecting the shoulders and arms of furniture and wrapping around delicate wooden surfaces including furniture legs.

Adhesive bubble is easy to use and is perfect for surface cushioning protection, maximum roll width 1500mm and can be slit to widths of 150mm, 300mm and 500mm.

### Bubble and Foam Laminate Options

- Bubble and foam
- Woven scrim
- Metalised film
- Adhesive film
- Paper
- HDPE film
- LDPE film
- Coloured and printed films
- Triple layer options available

## General stock product information

### Bubble and Foam Laminates

#### Foam and Bubble Laminations Specifications

Foam or bubble laminations can be supplied in roll form, sheeted or made into pouches. Laminate substrates can be combined with bubble or foam to form double sided laminations or 'sandwiches'. Restrictions apply subject to substrate.

Virtually any polyethylene coated material can be laminated to bubble or foam. Please note that the lamination process causes some unavoidable shrinkage in foam thickness - this is more noticeable with the heavier substrates, such as woven polyethylene, please make allowances for this when specifying your product choice.

- Bubble laminate bundles available in small bubble - lightweight and heavyweight.
- Maximum bubble width: \*2500mm. Standard length: 100m small bubble.
- Foam laminate bundles available in standard thickness - 0.7mm, 1.0mm, 1.5mm, 2.5mm and 4.0mm.
- Maximum foam width: \*2000mm

Standard length: bundle lengths are dependent upon lamination substrates, but as a guide these lengths are typical:

0.7mm	300mm
1.0mm	300mm
1.5mm	200m
2.5mm	120m
4.0mm	75m

Delivery lead times apply for laminate products and non-stock substrates. Minimum order quantities for standard stock substrates: 20 bundles. Special or printed films and papers: subject to suppliers' minimum requirements. Special substrates are subject to minimum order quantities.

\*Width subject to substrate specification.

Stock Foam Kraft Laminate  
2.5 mm foam laminated to 90 gsm paper (+ PE-coating)

Code	Foam Kraft Laminate 2.5mm + 90gsm
08103	1 x 1500mm x 60m
08106	1 x 1000mm x 60m
